

Funding for heating and energy solutions

Do you have properties that have electric heating, or are in off gas or rural areas? Are you unsure of alternative heating options and how to fund them? If so HQN can help.

We can:

- Help identify off gas, rural properties within your stock; including poorly performing properties that are in low income, deprived areas that may be more eligible for funding
- Provide a feasibility study on the options available, whether it be getting gas connected, or providing alternative renewable solutions
- Identify and secure external funding
- Help to secure government subsidies
- Work with you to deliver the project – resident engagement/consultation, funding compliance, and DNO/Planning process
- Deliver an energy/education programme to front line staff and residents to ensure the project is sustainable and all stakeholders know how to use the system, the benefits, and to ensure future funding claims are made.

Our consultant Nick Huston – will use his contacts and experience of securing significant levels of funding to help you maximise the funding opportunities that are available. Nick is a funding specialist, with extensive experience of delivering social housing energy projects. Nick spent two years in the charitable sector managing a large £26 million fund on behalf of Ofgem and central government. This gave him the opportunity to work with numerous housing partners and important stakeholders all over the UK.
