SAFETYnet annual conference 2021: Back to basics to build a better tomorrow | Thursday 23 and Friday 24 September 2021

This year's annual conference starts by going back to the basics of health and safety – covering some of the key things which might have had a lower priority during Covid. It then looks to the future highlighting the important imminent changes coming for registered providers and health and safety teams.

The pandemic has been a challenging time for many resulting in changing priorities and altered working practices. And now we have the new Building Safety Bill. This conference gives everyone with responsibility and an interest in health and safety to recentre and refocus – catch up with the basics of the big six (fire, electrics, gas, lifts, asbestos and water safety) and get ahead of the game with the Building Safety Bill.

Day one: Back to basics | Thursday 23 September

10:00 Welcome and introduction
Steve Pettitt, LQ Group
